

PUBLIC HEALTH PARASITOLOGY

PHC 6513
Fall 2007

Lab Section
New this Year!

Human diseases caused by parasites remain a major global public health concern. Topics covered in this course include the biology, sources of infection, route(s) of transmission, geographic distribution, clinical disease, and control/preventive measures. Instruction will include lectures and weekly laboratory sessions. For additional information call (813) 974-1273 or send an email to dkyle@health.usf.edu or mtucker@health.usf.edu.

Important!
