

Florida Imaging Associates, PL – ARNP Job Post

An exciting opportunity awaits you with a well-established, growth oriented company. Florida Imaging Associates, PL is the premier provider of imaging services and radiologic procedures in Western Florida. Comprised of more than 22 subspecialty-trained, board-certified physicians, FIA delivers superior and comprehensive radiologic services including Interventional procedures, Nuclear Medicine/PET, MRI, CT, Ultrasound, Women's Imaging, and Radiation Oncology.

Members of our practice, based in six of Florida's leading hospitals, utilize state of the art equipment and cutting-edge technology to diagnose and treat numerous medical conditions. Our mission is to provide the highest quality medicine for our patients and the healthcare community in a considerate, caring, and timely manner. Accuracy, attention to detail, professionalism and a commitment to excellence are the trademarks of our practice.

We offer a competitive compensation package dependent upon experience, including a comprehensive benefits package and a 401k retirement plan.

FIA currently has an opportunity for a seasoned Interventional Radiology Nurse Practitioner to add to our staff.

Qualified candidates must meet the following requirements:

- Must be Family Practice certified
- Must have Interventional Radiology, Radiology, Surgical or Critical Care experience

Summary Job Responsibilities:

- Document patient encounters in progress notes.
- Perform history and physicals.
- Write orders as pertinent to the management of patient health problems which are acute, self-limiting illnesses or chronic illnesses and for which the ARNP has sufficient training and experience in the management thereof. Management areas include care of the patient prior to, during and following the radiological interventional procedures, wound management, diet intervention, insertion and removal of arterial, venous, and/or PICC lines, management of drainage tubes, emergency intervention per ACLS protocols; and for treatments, laboratory tests and diagnostic tests that are required by the Interventional Radiologist.
- Perform procedures depending on the patient's condition and adherence to established protocol.

Qualified Candidates should submit their resume and earnings history to:

Mr. Patrick J. Daly
Associate Director of Physician Recruitment
